Avralize

European Tour 2027

Heavy grooves. Huge hooks. No standing still.

AVRALIZE are bringing their explosive live energy to Europe for a headline tour in November and December 2027.

Blending crushing riffs, infectious melodies and electronic textures with an unmistakable sense of groove, the German four-piece make heavy music built to move people. Brutal breakdowns meet danceable rhythms, while soaring choruses turn a room full of strangers into one voice.

Following their albums FREAKS and liminal, international touring and a debut headline run featuring multiple sold-out shows, AVRALIZE return with their sights set higher. These headline nights give the band room to bring every side of their sound to the stage: the weight, the emotion, the swagger and the moments of pure release.

From Manchester on November 13 to Vienna on December 5, expect heavy riffs, massive singalongs and a crowd that moves from front to back. Whether you've been there from the beginning or are seeing AVRALIZE for the first time, come ready to get involved.
